STIHL QUALITY

NEW LOW PRICE

The ideal homeowner trimmer - ergonomically designed, powerful and lightweight.

\$149⁹⁵ MSRP \$189.95

FS 38 Gas Trimmer

BENEFITS OF CURVED SHAFTS

Curved shaft trimmers can be considered easier to maneuver and more comfortable to use by homeowners. These trimmers are lighter and weigh less than a straight shaft trimmer. In addition, many homeowners find the shorter length of a curved shaft trimmer is more convenient and useful for them to operate.

Curved Shaft Models	Engine Size (cc)	Engine Power (kW)	Weight (kg/lb)	MSRP	Promo Price

YARD AND GARDEN TIP

A tree can be the focal point of one's landscape. Produce a healthy environment for a tree by laying a bed of mulch 2-4 inches in depth around the base of the trunk. The bed of mulch will reduce grass growth which in turn will provide added water and nutrients for the tree's root system. Also the mulch will act as a natural temperature control system to insulate the tree's roots, limit weeds and protect the tree from mower and trimmer damage.

VERSATILE STRAIGHT SHAFT

This quality straight shaft trimmer will get the job done.

\$249⁹⁵ MSRP \$279.95

FS 55 R Gas Trimmer

BENEFITS OF STRAIGHT SHAFTS

Straight shaft trimmers are the choice of lawn care professionals and large property owners. They are known to manage heavier brush and thicker weeds better than curved shaft models. Straight shaft trimmers have more reach and some can interchange cutting attachments like metal blades to offer enhanced versatility. Taller individuals enjoy the extended length of the shaft. For the avid user bike handles are also available.
