BRILLIANTLY REDESIGNED

2014 Highlife® Collection & Highlife Collection NXT Spas

A Revolutionary New Design

The new 2014 Hot Spring® Highlife® Collection was designed with help from the experts at **BMW Group DesignworksUSA**.

DesignworksUSA's world class design skills, combined with the Hot Spring team's ability to leverage innovative technology, culminated in a revolutionary new spa design. The new design is **stylish, functionally simple, and comfortable**.

About BMW Group DesignworksUSA

An acquisition of the BMW Group, DesignworksUSA is a creative consultancy that has been driving innovation for over 40 years. In addition to designing BMW vehicles, DesignworksUSA's client list includes internationally renowned brands.

2014 Highlife® Collection

With meticulous attention to detail, **BMW Group DesignworksUSA** and the Hot Spring® design team redesigned every visual element to produce a more beautiful spa, and a better hot tub experience. From the **flowing waterfall design at each corner** to the new **Moto-Massage® DX faceplate, jets, levers and pillows**, the 2014 Highlife Collection is harmoniously designed with purpose behind every detail.

2014 Highlife Collection NXT

In addition to the completely redesigned 2014 Highlife Collection, we are proud to introduce **three additional models** in our exclusive NXT line. Representing the future of spa design, these models offer an entirely new look – unlike anything else. Their distinctive styling, with a **unique floating effect, architectural molded corners** and **exterior lighting**, make the NXT models look sleek and stylish.

WATERFALL CORNER DESIGN

At each corner, a waterfall-like detail gives the impression that the shell is flowing over the cabinet, and helps visually integrate the shell and cabinet.

MOTO-MASSAGE DX JET

This signature jet offers a bold new look. Colorful light shines brightly through the frosted acrylic faceplate. The redesigned pillow compliments the trapezoidal design used throughout the spa's interior.

ERGONOMIC LEVERS

Re-engineered air control and diverter levers compliment the overall design and are easier to grip and turn.

JETS AND SHELL STYLING

Jets feature a modern design that combines stainless steel with molded plastic, further accentuated by elegant shell styling that also matches the footwell pattern.
