1

2

- Restores & rejuvenates rubber components
 - Restores (swells) rubber that has shrunk up to 2% (no over swelling)
 - Proprietary low molecular weight esters
 - Stops and reverses embrittlement
- Fast results
- Breaks down fuel gums and shellac (cleans)
- Breaks down hydrolysis of detergents in lubricants
- Pacifies aluminum, a cationic protectant
 - Affinity for rubber and metal
- Encapsulates water, reverses phase separation
- Ability to wick vertically (hydraulic wicking action)
- Dramatically reduces surface tension to 20 dynes
 - Allows submicron penetration
 - Allows the formula to penetrate deep into the carburetor circuitry

3

Patented, In-Tank Fuel Drying Technology

FUEL-LIFE™

- removes water
- stabilizes fuel
- stops phase separation
- stops corrosion
