PUMP STATIONS

PROFESSIONAL TURF PRODUCTS (PTP) CAN PROVIDE AS LITTLE OR AS MUCH SERVICE AS YOU NEED

INSTALLATION

Turnkey Project Management

PTP can handle it all. Installing all treatment and pump equipment, and optimization of the complete irrigation system.

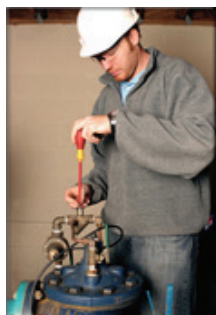

RETROFITS & ADDITIONS

Do you need to upgrade your system?

PTP can add to or adapt your current system to meet your needs.

SERVICE AND PREVENTATIVE MAINTENANCE

On Demand or Contract Service

We will be there when you need us. PTP provides 24/7 On Demand Service as well as Preventative Maintenance Contracts (highly recommended to reduce the number and cost of service calls you have to make).

What we can provide:

PTP is the exclusive supplier of these golf irrigation products within its service area:

TORO®

WATERTRONICS

**LET PTP BE YOUR RESOURCE FOR
ALL YOUR IRRIGATION NEEDS**

Toro has been the premier provider of golf course and professional landscape irrigation equipment since 1962. It revolutionized the industry in 1971 with the introduction of the first gear driven sprinkler head (now an industry standard). *Toro* irrigation equipment is used on 65 of the top 100 golf courses in the U.S. and many premier courses worldwide including Valderrama, site of the 1997 Ryder Cup, and St. Andrews.

Otterbine produces a line of water quality management devices that mechanically aerate, a process that transfers oxygen into the hydro-environment, keeping a natural balance between the key elements of pond nutrition, and, ultimately, reducing algae and foul odors. The devices can be high profile floating fountains, low profile horizontal actuators, or submersible injectors, depending on the preference of the client. *Otterbine* was the first to introduce mechanical aeration to the industry in 1952 and today is still considered the premier manufacturer of such equipment.

Watertronics introduced prefabricated pumping systems in 1972 to the golf and landscape industries. Engineered specifically for your course, *Watertronics* offers a Vertical Turbine and Horizontal Centrifugal pump system solution for small-to-large scale irrigation requirements. Your pump station arrives pre-engineered and factory tested, ready for quick installation and start-up. With proven reliability and pumping efficiency. *Watertronics* offers a cost-effective solution that's fully customized to meet your needs.

PROFESSIONAL TURF PRODUCTS, LP

(Y)OUR IRRIGATION TEAM

Five service facilities have been strategically located throughout its service area so as to assure adequate coverage.

These facilities are located in Euless, Houston, and Selma, TX; Broken Arrow, OK and Lenexa, KS.

Each facility operates as the base of operations for PTP's regional service teams.

Irrigation controller repair service (based in Euless, TX)

PTP's irrigation service team consists of five field service technicians and an in house controller repair technician. Each of the five field service technicians are **Licensed Irrigators**.

Additionally, PTP and its technicians are licensed by the FCC and perform all radio frequency surveys and attenuation checks in-house. Each technician is Toro Lynx and Site-Pro certified to the advanced level. PTP is the only distributor in its service area to maintain a full time, managed and dedicated service team.

PTP's Controller Repair Center provides 24 hour turn around on all solid state circuit board repairs including competitive products. All mechanical control systems are returned within five working days. Flat rate charges apply to all repairs that are out of warranty.

The Toro NSN Team

Irrigation computer support is provided by PTP Water Management Specialists and by the **Toro National Support Network (NSN)**. Toro is the only manufacturer in the industry to maintain in-house computer component assembly and support. Its team of 20 telephone technicians provide 24 / 7 technical assistance for software and hardware. NSN also provides warranty support for all computer and software components sold in conjunction with the irrigation system.
