### what they say

"We use the Harper TV35 mainly for verti-cutting and right after aeration or to vacuum up any grass clippings. The Harper vac has the recirculation system which drastically cuts down on dust."

**Wayne Thompson, Head Groundskeeper**  
Osceola County Stadium • Kissimmee, FL

## Harper TV35

Verti-cut + Vac = One Pass

60" width + 3/4" blade depth

## OUR ROOTS RUN DEEP

### *Harper Heritage*

*Harper Turf's roots can be traced back to 1986 with the production of the DewEze All-Terrain Mower. This innovative, two-wheeled, self-leveling machine took the danger and difficulty out of mowing slopes. The company expanded into the turf debris management and landscaping lines with the acquisition of Goossen Industries in 2002, creating a new and diversified Harper Turf division. Today, Harper Turf Equipment manufactures multiple product lines, ranging from the hillside mower, turf vacuums, verti-cutters, and more.*
