## Kask Super Plasma

*Innovative design, light, compact and designed for the professional world and workplace safety.*

10.201

### Features & Benefits

- The UP&DOWN adjustment mechanism gives a precise and comfortable fit, thanks to its unique double pivot design. This allows the back of the head to be cradled by the straps, which are then easily tightened to the correct tension by a central ratchet wheel.
- The high-tech 2DRY® fabric provides maximum comfort and rapid absorption of moisture keeping the skin fresh and dry. Polygiene® treated inner padding permanently inhibits the growth of odor-causing bacteria, provides greater freshness, odor elimination, integrity and preservation of material, and reduction of washing frequency. The padding is supplied with two labels/tags that guarantee the originality of the fabric and its Polygiene® treatment.
- Airgrid ventilation with 10 air intakes that keep the head cool at all times. Air intakes protected by an aluminium anti-intrusion grille.
- Provided with external luminescent lamp clips made of acetalic resin, compatible with all helmet lamps with elastic band available on the market.
- Provided with a ring to hook the helmet onto a harness.
- May be fitted with the Kask visor, winter cap or replaceable internal helmet padding

## Super Plasma Hi-Viz

Lightweight, compact, comfortable & well-ventilated with 10 air intakes that provide efficient cooling & ventilation

### Features & Benefits

- The UP&DOWN adjustment mechanism gives a precise and comfortable fit, thanks to its unique double pivot design. This allows the back of the head to be cradled by the straps, which are then easily tightened to the correct tension by a central ratchet wheel.
- The outer shell in fluorescent color is high density and shock resistant.
- Reflectors for night-time visibility.
- The internal shell in HD polystyrene has ducts for air flow and recycling.
- Provided with external luminescent lamp clips made of acetal resin, compatible with all helmet lamps available on the market.
- The high-tech 2DRY® fabric provides maximum comfort and rapid absorption of moisture keeping the skin fresh and dry. Polygiene® treated inner padding permanently inhibits the growth of odor-causing bacteria, provides greater freshness, odor elimination, integrity and preservation of material, and reduction of washing frequency. The padding is supplied with two labels/tags that guarantee the originality of the fabric and its Polygiene® treatment.
- May be fitted with the Kask visor, winter cap and internal helmet padding
