

DIAMOND DRILL RIG

SPECIFICATIONS:

120v. 20 amp
450/900 rpm
Dimensions: 47"x 14.5"x 22.5"
Weight: 95 lbs
Current bit selection:
2", 3", 4", 6", 8", 10" and 12"

PROCEDURE:

- Water must be used at all times. (Hookup provided)
- Core bits are rented separately from machine.
- Bits should not run in sand below floor or outside of wall and will not drill through steel decking.
- Core bits will be measured before and after rental. (Wear charge / .001" can be found in inventory price book.)
- Bits must be returned clean of any concrete slurry inside bit and between segments.
- Tool is ideal for industry to install machine protective guards to prevent fork truck damage.
- Unit will be sent with wrench, rubber gasket and electric power tool safely literature. Condition and placement of gasket is critical.
- Unit will drill in upright position without anchors with vacuum pump mounted on base of unit or wedge.
- Unit can be mounted on concrete wall with drop-in anchors.
- Unit must be used with grounded outlet only and 10/3 power cord must be present.
- GFI protection may be required on OSHA inspected job sites.
- If machine is used on the floor, make sure anchor bolts are not protruding the base of the machine.
- Customer will be charged for any clean up and damage due to neglect.
