## How To Order a Replacement Axle Beam **DEXTER AXLE**

Answers to the following questions will provide us with all of the necessary information to get your axle beam ordered and in your hands quickly. Make sure you have the answers to these questions close at hand when placing your order.

AXLE COMPONENTS

- 1) Spindles: Are they straight, drop, E-Z LUBE® or Nev-R-Lube®?
- 2) Inner and Outer Bearings: What are the bearing numbers?
- 3) Seal: What is the I.D. and O.D. or Reference Number of the seal?
- 4) Tube: What is the outside diameter? Is the tube round or square?
- 5) Hub Face: What is the measurement from base of studs on one side to base of studs on other side?
- 6) Spring Pads: What is the measurement from center to center of pads?
- 7) Brake Flange: What is the measurement from outside to outside of brake flanges?

\*2K - 7K Axle Beams Available w/optional V-Bend and/or Stainless Spindle Wear Sleeves.

### Equation to Figure Hub Face from Flange to Flange Dimension

This chart is a handy guide for figuring the hub face dimensions, when you only have a bare beam with a flange from which to measure.

Axle Model - Equation
2K - Hub Face = Outside of flanges + 6.90
3.5K - Hub Face = Outside of flanges + 6.34
5.2K (655) - Hub Face = Outside of flanges + 8.73
6K, 7K (865) - Hub Face = Outside of flanges + 8.73
5.2K - 6K W/Demountable Hub - Track = Outside of flanges + 7.73
7.2K - Hub Face = Outside of flanges + 7.54
8K - Hub Face = Outside of flanges + 9.09
Old 9K - Hub Face = Outside of flanges + 10.46
9K, 10K GD (2-piece) - Hub Face = Outside of flanges + 13.50
9K-10K GD (1-Piece) - Hub Face = Outside of flanges + 10.98
10K Heavy Duty - Hub Face = Outside of flanges + 14.35
12K Low Profile - Hub Face = Outside of flanges + 21.77
12K High Profile - Hub Face = Outside of flanges + 15.27
15K - Hub Face = Outside of flanges + 17.45
10 on 11 1/4" Hub - Hub Face = Outside of flanges + 11.16
Tag Axle w/9-20 Drum - Hub Face = Outside of flanges + 17.19
Tag Axle w/9-23 Drum - Hub Face = Outside of flanges + 15.38

Note: These equations are valid for any axle where the same hub is used. For example, any hub that goes on a 3,500 lb. axle has a total flange to hub face difference of 6.34" regardless of whether it is a straight, drop or TORFLEX®.

\*9K & 10K GD axles built prior to July 27, 2009 must specify "OLD STYLE" Spindles.

## TORFLEX® Axle Beams\*

## Agricultural Hubs

We have Agricultural Hubs and Spindles in the most popular bolt patterns for use in building or repairing implement wagons, carts or machinery. Agricultural hubs and spindles are designed for low-speed applications; weight capacities shown for speeds not to exceed 20 m.p.h.

### 4 Bolt, 5" Bolt Circle

- **LM67048 Inner, LM11949 Outer Bearing**
- Capacity of 1,500 lbs. per each
- Use with spindle #AS1500E

PART NO.	REF. NO.	DESCRIPTION
AH15450ECOMP	125600	COMPLETE HUB ASSY- INCLUDES THE FOLLOWING
AH15450E	125400	AGRICULTURAL HUB ONLY, DRILLED & TAPPED

**DEXTER AXLE**

For custom building axles, or anywhere a spindle/hub would be preferred over a complete axle. Examples include: portable welders, cattle “squeeze-chutes”, industrial dollies, etc. These End Units come completely assembled and feature the E-Z LUBE® option for easier bearing lubrication. Available with idler hubs and with electric or hydraulic brakes.

## How to Order Replacement Hubs or Hub & Drum

To order the correct replacement hub or hub and drum, the following steps can be used to simplify the ordering process:

1. **Determine the Bolt Pattern of the Hub.**  
Refer to page E-6 of this catalog for instructions on making this determination.
2. **Determine the Inner and Outer Bearing Numbers. Note whether the bearings use grease or oil bath lubrication.**
3. **Measure the old hub seal to insure that the I.D. and O.D. dimensions will be the same.**
4. **Verify the Stud Diameter.**
5. **If the axle is a brake axle, measure the diameter and width of the brake to determine brake size.**
6. **Look for any casting numbers on front or rear of hub or hub and drum.**
7. **On heavier axles, such as the Dexter 8,000 lb. or 9,000 lb. axles, you need to determine the hub pilot diameter. This can be accomplished by measuring the center hole of your wheel.**
8. **On 8,000 lb and larger axles determine if it is equipped with ABS, and requires a drum / rotor with ABS exciter ring installed.**

Once you have the above information, you are ready to locate your replacement hub or hub and drum. Hubs are listed on pages B-12 thru B-17. Hub and drums are listed on pages B-18 thru B-34. Locate the bolt pattern desired, then find the table that lists our inner and outer bearing numbers.

Verify: Inner/Outer Bearing Numbers  
Type of Bearing Lubrication  
Stud Size  
Seal Size  
Drum Size

Confirm brake size and/or hub pilot diameter (if applicable). Complete assemblies contain the hub or hub and drum, inner and outer bearings, seal, grease cap or oil cap and all necessary wheel nuts.

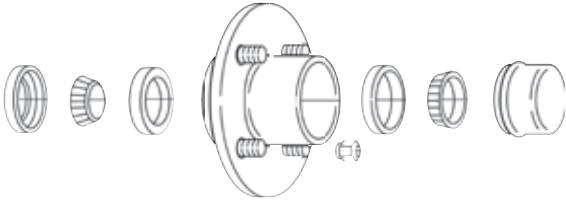

Hubs are Shown on Pages B-12 thru B-17  
Hub and Drums are Shown on Pages B-18 thru B-34

Replacement Hubs are listed in order of bolt pattern, starting with 4-bolt, and ending with 8-bolt.  
All are cast iron, one-piece units for durability.

### 4 Bolt, 4" Bolt Circle

AXLE  
COMPONENTS

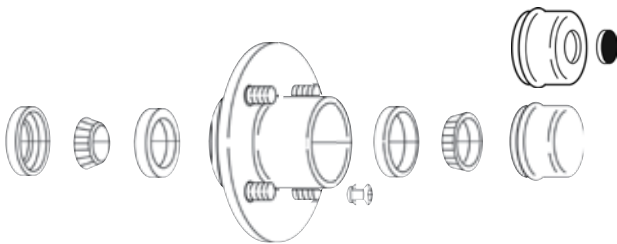

- Fits BT8 1" Spindle, L44643 inner/outer bearings
- Capacity of 1,000 lbs. per each

## 8 Bolt, 6.5" Bolt Circle

- **25580 Inner / 02475 Outer Bearings**
- Fits Dexter 7,200 lb. Axles
- Oil Bath, Grease or E-Z LUBE®
- Hub comes with  $\frac{9}{16}$ " or  $\frac{5}{8}$ " studs
- Drum Size: 12  $\frac{1}{4}$ " x 2  $\frac{1}{2}$ "

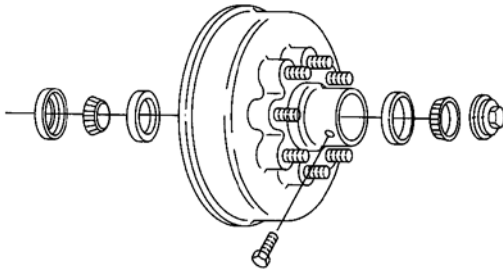

In February 2000, the 7,200 lb. axle was upgraded from a 9-bolt to a 4-bolt brake flange. Be sure to verify flange type before making your selection, hub/drums will not interchange.

## NEV-R-LUBE®

**No need to pull the hubs to repack the bearings!**  
**No need to replace seals when you check the brakes!**  
**No more inner and outer bearings!**

AXLE  
COMPONENTS

### Pre-set Adjustments.

Ease of installation. Human error is virtually eliminated in bearing adjustment.

### Pre-Lubricated at the Bearing Factory.

Resistant to contamination.

### Sealed for Life.

No bearing maintenance. Increased durability and reliability.

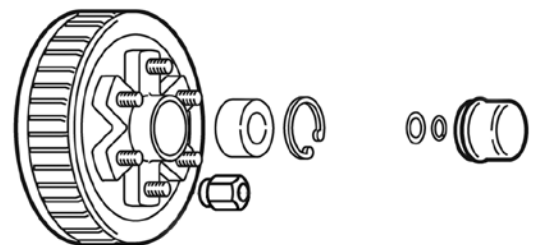

### Lower maintenance cost.

5-year or 100,000 mile warranty against defects in material or workmanship.

Available in 35mm cartridge, 42mm cartridge and 50mm cartridge.

## NEV-R-LUBE® 6 Bolt, 5.5" Bolt Circle

- Fits Dexter 35MM NEV-R-LUBE® Axle
- Capacity of 1,750 lbs. per each
- Drum size: 10" x 2 1/4"
- Discontinued Axle Option by Dexter, effective February 1, 2011.

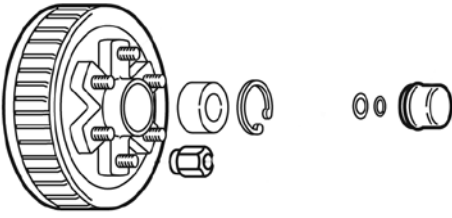

PART NO.	REF. NO.	DESCRIPTION

\* Disc Kit includes 1ea: 545 Hub, Rotor, Caliper, Bracket, Inner/Outer Bearings, Grease Seal & Cap for one side of axle beam. For complete axle conversion, order 1ea. K71-633 & 1ea. K71-634.

## Disc Brake: 6 Bolt, 5.5" Bolt Circle

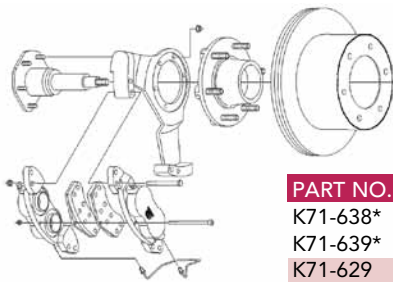

- 25580 Inner / 15123 Outer Bearings
- Fits Dexter and most other 5,200 lb./6,000 lb. axles
- Disc Brake Conversion Kits & Service Parts
- Std. Grease & Grease Lube Applications
- Economical One-Piece Hub/Rotor or Slip-On Rotor Design
- Available in Machine or Dacromet Finish (Marine)
- Stainless Steel also available

## Cap Driver Tools

Custom-sized specifically for trailer axle dust caps, this dust cap driver can be used for installation, removal, and servicing trailer hubs without denting the dust caps. Designed for ease of use by dust cap installers, no professional trailer service center will want to be without this handy tool.

## Bearing Protectors

RG07-045

RG07-040

11073

Bearing Protectors keep grease inside the hub and water out! An overload outlet allows grease to escape if the hub is overfilled or excessive pressure is built up. Fits 1.980" 2K-3.5K hubs with L44610 outer race. Bearing Protector Covers keep the excess grease from being thrown on the wheels while trailering.

PART NO.	REF. NO.	DESCRIPTION
BLB1	414000	BEARING PROTECTOR COVER, FITS 2.125" O.D., 1EA.
RG07-040	414001	PKGD 1.98" BEARING PROTECTORS & COVERS, 1 PAIR (2" O.D.)
RG07-045	414002	PKGD BRG PROTECTOR COVER, FITS 2" OD PROTECTORS, 1PAIR
11073	414005	1.980" BRG PROTECTOR, STAINLESS STEEL, 2.125" O.D.

## Kodiak RED EYE<sup>®</sup> Bearing Protectors

Protects wheel bearings from contamination by water, salt and dirt by providing and maintaining a positive hub seal. The RED EYE<sup>®</sup> Bearing Protector tells you when it is full and when to add grease; preventing over filling and causing inner-seal failure. When the red washer on the indicator is flat against the housing, it is time to add grease. If the RED EYE<sup>®</sup> indicator repeatedly tells you to add grease, this alerts you of a possible inner-seal failure that you may not realize you have without the RED EYE<sup>®</sup>. Comes in 2 different sizes, with a Limited Lifetime Warranty.

AXLE  
COMPONENTS

With its patented chrome plated aluminum one-piece housing and two O-ring seals, RED EYE<sup>®</sup> is the only bearing protector guaranteed not to leak grease. Most importantly, it assures you it is keeping dirt, water and other contaminants out of the wheel bearing area. This, combined with a spring-loaded piston, maintains a constant positive pressure on the hub, even when submerged in cold lake water.

## Replacement Bearings

Replacement Bearings are high quality tapered roller bearings, designed for high-speed use. All bearings have industry standard numbers, regardless of the brand. Inner diameter of bearing is included for your convenience.

### Makes Bearing Replacements Easier and Quicker! One Kit Per Wheel Required!

#### Wheel Bearing Kits are available for:

- Applications ranging from the BT8 1" spindle to 7,000 lb. spindles
- All kits include: Double Lip Grease Seals, allowing kits to be used with standard or E-Z LUBE® Spindles.

#### Each Wheel Bearing Kit includes:

- One Inner Bearing and Race
- One Outer Bearing and Race
- Grease Seal
- Cotter Pin
