

STAINS 101

THE SCIENCE OF STAINS

MADE SIMPLE

Keeping your boat looking great is easy when you know the basics. Those basics include four common types of stains that can be frustrating if you don't know how to remove them. This handy *Stains 101 Guide* will help you properly identify and remove each of the four basic stains, and keep your boat looking like new.

It's the science of stains made simple!

SURFACTANT TECHNOLOGY

TO COMBAT

DIRT & GRIME

THE STAIN

Dirt, grime, gunk, muck. Fish blood, food, drinks. These are your surface stains.

THE SCIENCE

Most surface dirt will wash right off with boat soap and water. However, some gets ground in, especially on non-skid surfaces. That's where surfactants come in. Surfactant molecules fully surround the dirt molecules and lift them from the surface that you're cleaning. This allows them to be washed away with water. Chelating agents are supercharged surfactants for specialized cleaning.

THE SOLUTION

Star brite Boat Wash will definitely remove most surface dirt. For tough grime and gunk, use a cleaner/degreaser, such as Star brite Xtreme Clean or choose a surfactant based on the surface: Non-Skid Deck Cleaner for non-skid, Vinyl Clean for vinyl, etc...

85932

ACID TECHNOLOGY

TO COMBAT

RUST & TANNIC STAINS

THE STAIN

Tree leaves, hull stains, rust stains, waterline stains, hard water stains, orange stains.

THE SCIENCE

Tannins are naturally produced in the decomposition of plant-based matter, and their signature orange-hued stains are dying your hull and fiberglass. Rust stains occur on the fiberglass around metal, where water leaches color from underneath the metal and deposits it on the surface. Removing these stains requires a chemical reaction with an acid.

THE SOLUTION

Star brite Instant Hull Cleaner contains a modified oxalic acid that safely neutralizes tannins and rust. There's much more science behind it but trust us on this one, simply spray or wipe on and watch the stain disappear.

81732

BLEACHING TECHNOLOGY

TO COMBAT

MOLD & MILDEW STAINS

THE STAIN

Black, brown, green, and pink mold and mildew stains.

THE SCIENCE

Similar to grass stains, these stains are caused by organic material, and need something stronger than a surfactant alone to remove them. The oxygen in a bleaching agent attacks and breaks up these types of stains, and removes any discoloration.

THE SOLUTION

While most people believe that regular chlorine bleach is the answer, it also causes a lot of problems, such as breaking down fabrics and stitching and destroying gelcoats. Instead use Star brite Mildew Stain Remover—a buffered bleach formula—that attacks the stain without harming the surface.

85632

ABRASION TECHNOLOGY

TO COMBAT

SCUFF MARKS

THE STAIN

Black shoe marks, rub rail and bumper scuffs, marks left from dragging hoses and equipment.

THE SCIENCE

Scuff marks—or “transfer stains”—happen when material is transferred onto a surface and is mechanically bonded. Chemicals are rarely strong enough to remove these marks, since many times the material that has transferred is chemical-resistant (think of a rubber shoe). These abrasive marks require the same to remove them: abrasion.

THE SOLUTION

Star brite Ultimate Magic Sponge uses nano-sized scrubbers to grab hold and erase most marks easily. For your hull, use Premium Cleaner Wax to buff the stain away.

Elastomeric is the one product for all jobs!! It meets or exceeds the characteristics of silicones, polyurethanes and polysulfides.

Elastomeric Marine Sealant

A one part, fast skinning (10 min.) and fast curing (24 hours) multi-purpose sealant with superior strength, adhesion, elongation and life characteristics. Cures in temps from 20 to 120 degrees fahrenheit and can be wet sanded and painted after cured. Flexibility and compression capabilities are excellent. *It is the perfect sealant for heavy duty service above or below the waterline.*

LifeSeal® Sealant

A unique combination of marine silicone and polyurethane, formulated especially for fiberglass. LifeSeal offers a fast-curing, low odor, high adhesion, non-sagging, non-corrosive, non-yellowing formula. It provides a durable permanent watertight seal for joints subject to structural movement. May be used above and below the waterline. Use for sealing decks to hulls, thru-hull fittings, vinyl ports, sealing/glazing windshields and bedding marine hardware. Will adhere to metal, glass, wood, Lexan, ABS and certain other materials. Can be removed without damaging gel-coat. Not recommended for ferro cement hulls, impregnated wood or oil-soaked materials. Cures in presence of water. Mildew resistant and acid free.
