Pro Air System – For 12v Applications

The Pro-Air System air pump has advanced design features that are engineered under rigid quality control conditions to insure long lasting dependable oxygen-rich air source to your livewell or baitwell. The Pro-Air System is capable of aerating both front and rear livewells at the same time. The pump is constructed with a rubber base for quiet operation. The Pro-Air System air stone mounts, which are included, provide a trouble-free installation in livewells so that there are no loose or floating parts inside with fish. The air stone provides small air bubbles that are most efficient for leaching oxygen into water. The Pro-Air Systems comes complete with pump, two air stones, an attractive switch-panel with switch for controlling pump, and 20 feet of air line tubing.

FLOW-RITE

Power Jet Aerator
Designed to be mounted below the surface of the livewell for direct introduction of fresh oxygenated water from a livewell mounted pump.

Mfg #MH-PJA-120
Order No. 22440_T \$13.99

FLOW-RITE

Power Stream Aerator

The PowerStream aerator includes its own through-hull elbow. The venturi air intake at the top of the aerator allows the water flow of the recirculating pump to efficiently entrain oxygen into the water and through the mixing tube. Fresh oxygenated water is then discharged horizontally well below the water surface for the fast oxygen disbursement to all levels of the livewell. Discharge can be rotated 360° for proper flow to create a gentle circular current.

Mfg #	Description	Order No.	Retail

MH-PSA-209	Qwik-Lok	22437 _T	15.49

FLOW-RITE

Power Stream Nozzle

The PowerStream Nozzle utilizes the same efficient venturi as the PowerStream Aerator, but is designed for above water line use. The specially designed discharge will allow fresh oxygenated water to penetrate even the deepest depths without the use of a down tube. The nozzle may be swiveled left or right to create the desired circular current.
