

Detailing Products to Maintain the Appearance and Value of Your Vehicle

Club Car vehicles are noted for their timeless styling and classic good looks. But without proper care, the weather, fertilizer, bugs and other environmental factors can mar their appearance and reduce their resale value.

With that in mind, we developed a line of detailing products specifically formulated to protect and renew the finishes on Club Car vehicles. You can also use these products to restore the appearance of a neglected vehicle and increase its resale value.

Since these products make detailing quick and easy and deliver superior results, they are used to maintain the fleets on some of the world's most prestigious golf courses.

When detailing your car, begin by washing it with a standard automotive car wash, using a soft cloth and a garden hose at regular pressure. (Do not pressure wash your vehicle.) Then detail the vehicle, using the following products.

Finish Restore to Renew the Gloss

Over time, the body and trim of your vehicle can lose its luster due to oxidation. But you can revive its appearance by removing surface layers of oxidized paint or plastic with Finish Restore.

This product quickly dissolves oxidation, black scuff marks, sap, bug residue, grease, grime and mildew stains without harming the body or trim. (Club Car Part Number AM1250301)

Wax All to Shine and Protect

Wax All brings out the gloss and protects your vehicle's finish. Its unique blend of synthetic polymers and Carnauba wax cleans surface contaminants and delivers a long-lasting shine with added UV protection. The spray-foam formulation can be used on wet or dry vehicles and buffed to an immediate shine.

Additional coats will develop an even deeper gloss and help surfaces resist further marking, fading and hard water marks. (Club Car Part Number AM1250201)

Re-Black to Brighten Trim

The sun, rain and time can dull the appearance of black plastic and rubber trim. But Re-Black revives their original depth of color and repels moisture and dirt, preventing further damage. This non-staining, silicon-rich formulation has high viscosity for exceptional coverage and quick drying. (Club Car Part Number AM1250101)

Windshield Cleaner and Protectant for Clarity

When dirt, water, bugs and other materials cloud and spot your windshield, depend on Club Car's Windshield Cleaner and Protectant. Designed specifically for use on acrylic, Plexiglas® and vinyl windshields, this wax-free product cleans, fills in

minor scratches and protects your windshield from further build up and spotting. It also improves clarity and reduces glare and fog. (Club Car Part Number AM1250001)

Battery Terminal Protector to Guard Expensive Batteries

Take care of your batteries with our Battery Terminal Protector. This corrosion-preventing coating provides a long-term waterproof seal and extends battery life. The coating will not crack or peel even under severe flexing. Use it on battery terminals, cables, carriers and hold downs. (Club Car Part Number 1014305)

Dry Moly Lubricant and Coating to Help Preserve Mechanical Parts

This long-lasting dry lubricant adheres to almost all surfaces. It withstands high pressure and temperature, repels dirt and other contaminants,

and resists corrosion. Use it on mechanical brake cluster sliders, shifter cables and brake pedal pivots. For further information, see your owner's manual. (Club Car part number 1012151)

Club Car vehicles are sold through our worldwide dealer and distributor network. Find an Authorized Club Car Dealer near you. Visit www.clubcar.com and select "Dealer Locator."
