Vertex Vent Helmet

The Vertex Vent by Petzl is designed for maximum comfort, customization, and durability. The five ventilation holes can be quickly opened and closed with sliding shutters to meet changing environmental conditions. The polycarbonate shell is lightweight (16.4 oz) yet strong enough to meet applicable industry and mountaineering standards for impact and wear resistance. The complete and simple three-way adjustment system ensures a perfect fit for any wearer.

Landscaper's First Aid Kit

This 46-piece, 10-unit first aid kit holds all 8 ANSI required items in a plastic case with gasket. It also includes a 4" x 5" cold compress and a 40-page first aid guide. This kits comply with ANSI Z308.1-2003 requirements and meets or exceeds federal OSHA regulations.

- (1) 1" X 3" Adhesive plastic bandages, 16/bx
- (1) 3" X 3" Gauze dressing pads, 4/bx
- (1) 32 sq. in. Absorbent gauze compress, 1/bx
- (1) 40" Triangular sling/bandage, w/2 safety pins, 1/bx
- (1) Antiseptic cleansing wipes (sting free), 10/bx
- (1) Burn relief packs, 6/bx
- (1) .5" X 2.5 yd. First aid tape roll, 2/bx
- (1) 4" X 5" Instant cold compress, 1/bx
- (1) Exam quality vinyl gloves, 2 pr/bx
- (1) First aid guide

Logger's First Aid Kit

This 71-piece, Logger First Aid Kit meets OSHA standard 1910.266A and contains the supplies you're likely to need on the job. The sturdy plastic case includes a gasket to protect your supplies from moisture, keeping them dry and sterile.

- (6) 3/4"x3" Adhesive plastic bandages
- (1) AN101: 1"x3" Fabric bandages, 16/bx
- (3) Knuckle fabric bandages
- (3) Fingertip fabric bandages
- (3) 2"x4" Elbow & knee plastic bandages
- (2) 4"x4" Gauze dressing pads
- (2) 8"x10" Trauma pads
- (1) 2" Conforming gauze roll bandage
- (2) 36" Triangular sling/bandage w/2 safety pins
- (6) Antihistamine tablets, (3) 2-pks
- (1) AN337: BZK antiseptic towelettes, 10/bx
- (3) First aid/burn cream, 0.9 gm. packs
- (2) 2"x5 yd. Latex free elastic bandages
- (1) 1/2"x10 yd. First aid tape roll
- (1) 24"x24" Biohazard bag, 10 gallon capacity
- (1) CPR one-way valve faceshield, latex free
- (1) 3-3/4"x27" Rolled wire splint, 1/bx
- (1) B502: 52"x84" Emergency blanket, 1/bx
- (4) Exam quality vinyl gloves, 2 pairs
- (1) 4-1/2" Scissors, nickel plated
- (1) 4" Tweezers, plastic
- (1) First aid guide

Tautline Hitch and Blake's Hitch

These are used as the "climbers knot" to tie in. They must be kept tight to be effective. Extreme care must be taken to minimize heat build up in these hitches caused by fast descents. It is likely that a "bail out" descent will create sufficient heat to melt completely through the climbing line.

Prusik Loop

Used to "self-belay" when using the "foot-lock", it allows the climber to rest during the ascent. It must be tight to be effective and must never be used to descend a tree because it has little holding power in the direction it is pushed.

Munter Hitch

The Munter Hitch is used with a carabiner to control a descent and is considered more effective than a Figure "8" descender. It is easy to tie and is known as a running knot. It should not be used to rappel because heat build up can damage the rope.

The Figure "8"

Figure "8" is tied in the ends of lines to stop them from running out through blocks or other knots. It is easily untied even when cinched down tight and should be tied at least four inches from the bitter end so it has room to slip.

Double Fisherman's Knot

Normally used to tie two ropes of equal size together. Most commonly used by arborist to create a Prusik Loop.

Bowline

The Bowline will not slip or jam and is easily untied. It is generally used to attach the climbing line to saddle D-rings and to attach snaps or hooks to ropes. The Bowline creates about 40% rope strength reduction.

Clove Hitch with Half Hitch

The Clove Hitch is easy to tie and untie. It is often used to send equipment to climbers in a tree or in combination with a half hitch to tie limbs. The Clove Hitch creates approximately 40% rope strength reduction.

Timber Hitch

The Timber Hitch is sometimes used to attach a false crotch to a tree or to lower or hoist limbs. It should be considered somewhat unreliable because it has a tendency to slip or come undone. The Timber Hitch creates approximately 50% rope strength reduction.

Climbing Knots
