**Medical Solutions to Enhance  
the Quality of Your Life**

# Mobility Solutions

---

*Most insurers require special documentation and an assessment by a therapist. We can help in this process. Our business is BOC accredited and our caring and professional staff are ATP (RESNA-Certified Assistive Technology Professional) credentialed.*

**Our Staff** works with referring physicians and therapists, hospitals and home health agencies, consumers and their caregivers, and State agencies and organizations. Our team of experts can determine the correct solution for you. Our inside support staff has years of experience working with Medicare, Medicaid and private insurances. We work with physicians to obtain the paperwork and simplify the process for you.

## Complex Power Wheelchairs

### **Power wheelchairs**

We can provide power chairs with features to meet your individual needs. Varying seat widths, flip-up armrests and swing-away footrests are just some of the features available to make your life easier. Custom seating, tilt, recline and specialty drive controls are other options.

What makes our company different is our approach. We partner with the referring physician, therapist, case manager and you, the customer, to create a mobility solution that works.

We understand the importance of a properly fitted mobility system. Your wheelchair must be configured to function as an extension of your body as well as provide the proper support. Having a chair that fits will impact your comfort, your well-being and provide the long-term mobility solution you need.

**Contact us today to arrange a seating and mobility evaluation!**

# Manual Wheelchairs

---

**Manual wheelchairs** range from simple transport wheelchairs to custom-configured wheelchairs.

**Standard wheelchairs** will usually support up to 250 pounds, and are ideal for short-term use.

**Lightweight/ultra-lightweight wheelchairs** offer performance, comfort and versatility. They are lighter in weight and easier to propel than standard wheelchairs. They are ideal for long-term users.

**Bariatric wheelchairs** are specifically designed for individuals with special size and weight capacity requirements. These chairs offer extra wide seats and backrests, and additional durability in frame construction. When medical or functional needs for mobility are not satisfied with a standard chair, a bariatric wheelchair is an available option.

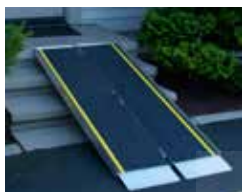

**Custom manual wheelchairs**, including tilt-in-space and rigid-frame wheelchairs, are available to meet more complex needs. Contact us to review coverage and qualification criteria.

# Services and Repair

*Making  
life easier*

## Services/Repair

**Equipment Orders • Supply Orders  
Power and Manual Wheelchair  
Evaluations • Accessibility Evaluations**

Clients should always choose a local medical equipment company that supports all the equipment it provides. We are proud to have factory-certified technicians who repair every item we sell or rent. Services can be provided at our facility or in a client's residence.

### Specialty Services

- Wheelchair assessments
- Custom fitting
- High-end power mobility w/alternative drive controls
- Custom molded seating
- Bariatric and pediatric equipment

***We have loaner chairs available for your use while we finish repairs on your equipment.***

# Pediatrics

We provide special training and education for our Assistive Technology Professionals because we understand the special skills needed by an ATP working with the pediatric population.

A customized seating product is vital to the proper support of the pediatric customer. Customized seating can ensure proper bone growth, prevent orthopedic anomalies such as scoliosis and allows for increased independence.

## Pediatric Products

- Custom Molded Seats and Backs
- Specialty Manual/Power Wheelchairs
- Standing Frames
- Feeder Seats
- Trays
- Walkers

We change the lives of children through the **evaluation, design, fitting and funding** of the specialized assistive technology they need.

**Our caring staff** understands the changing needs of our pediatric customers. We will craft the right solution and provide the equipment and support they need as they grow.

Mobility Solutions

# Seating and Positioning

---

## **Cushions and Backs**

**Pressure-relieving cushions** are designed to reduce pressure for patients at risk of skin breakdown.

**Wheelchair positioning cushions and backrests** provide pressure relief and positioning to ensure optimal independence and function.

**Custom-molded cushions and backrests** are created to meet the needs of patients with moderate to severe conditions. Many molding systems are available.

## **Other Accessories**

- Arm Rests
- Foot Rests
- Elevating Leg Rests
- Positioning Belts
- Anti-tippers
- Headrests
- Lateral Supports
- Foot Cradles
- Ramps

**Our RESNA Certified Assistive Technology Professionals (ATPs) provide custom wheelchairs and adaptive seating systems for children and adults challenged with severe disabilities. We also provide a wide variety of other specialized rehab equipment like standers, gait trainers, adaptive strollers and special needs car seats.**

# Accessories

*These convenient accessories promote accessibility and independence.*

## **Ramps**

Ramps remove barriers curbside and from entry ways and thresholds. There are several types of portable ramps available that can help keep your home environment and community accessible.

## **Bags and Pouches**

There are stylish pouches and mobility bags available to help you keep all your important stuff close by! Some fasten securely to the back or arm of your chair and others can be tucked securely under the seat of the wheelchair.

## **Cup Holder**

It seems we don't go anywhere anymore without our coffee, water or favorite beverage. There are cup and bottle holders that fasten securely to your chair, with no worries about spillage.

## **Tablet Holder**

Keep your tablet at your fingertips and stay connected with friends and family wherever you go. Re-positional tablet holders make it possible to access your tablet when you want to and to move it out of the way when you're taking a break.

## **Tray**

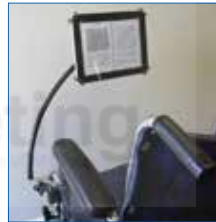

There are a variety of full-sized and partial trays available to make daily living activities easier and more convenient.

## **Holder for Oxygen tank, cane or walker**

There are holders for just about any piece of equipment needed while you go about your daily activities.

## **Chair Cover**

Protect your chair from the elements with water and wind-resistant covers.

*Wheelchairs and adaptive equipment have many features and specialty options to assist the user with daily living activities. Let us help you sort through the many possibilities and options available.*

*It's so important to purchase your equipment from a local company who services what they supply. We have factory-trained service technicians who work on all makes and models of power equipment and are available to perform equipment maintenance on site, including repairs and battery replacement.*
