**10 Year Hull Warranty**

**GLASSTREAM POWERBOATS**

# STYLE

# PERFORMANCE

The 240 CC is a truly revolutionary design that blends Family Sport Utility and Performance together into a mid-sized unit. The stepped hull design by A.L. Kirkland gives this boat incredible performance and economy with less horsepower required, which equates to better value. This family fun boats handles like a dream.

# VALUE

- \* FAMILY FUN & FISHING
- \* LOW COST OF OWNERSHIP
- \* ROOMY COCKPIT
- \* EYE CATCHING STYLE

In 1988 A.L. Kirkland invented the worlds first inverted, stepped hull for his race boat "Turn Of The Century." People thought: "It was just a fad." 30 years, later every modern performance boat uses a variation of that original design. The trademarked stepped hull radically improves handling and performance, reducing the amount of drag, initiating more lift. The end result a very fast, dry, soft ride.
