

Improving Patient Outcomes and Delivering Cost Savings

Looking to reduce *preventable* hospital readmissions for chronic obstructive pulmonary disease (COPD) – and improve quality-of-life for your patients?

PromptCare Respiratory's Non-invasive Ventilation for COPD Program

PromptCare®. Providing Expert
COPD Care from the Comfort
of Home.

“PromptCare really keeps us in the loop on how our patients are doing. We have not nearly seen as many return visits to acute care as we have with other providers.”

- Peggy Bartram, Director of Respiratory Care at Gaylord Hospital in Wallingford, CT

Taking a loved one home for the first time on medical equipment can be one of the most challenging tasks a caregiver can go through. PromptCare specializes in the high-tech needs of COPD patients and their families, and our goal is to provide the safest, smoothest transition home. Our dedicated team provides valued clinical expertise and overall case guidance as well as professional caregiver and patient education to improve peace of mind, reduce preventable hospital readmissions and emergency room visits. Through our innovative programs and dedicated care, we improve clinical outcomes and the overall quality of life for your COPD patients. That’s why we’re the company more pulmonologists trust for managing their most medically complex respiratory patients.

PromptCare’s Noninvasive Ventilation for COPD Program focuses on:

- Establishing a partnership with a patient’s physician and hospital
- Evaluating a patient’s home environment for safety
- Improving communication between the patient and their physician
- Providing disease state management and patient ventilator training for their therapy
- Conducting ongoing monthly visits by a PromptCare respiratory therapist to reinforce understanding and ensure therapeutic compliance
