

## *Diesel Particulate Filter*

*For TriPac™ Hybrid Auxiliary Idle Reduction  
and Temperature Management System.*

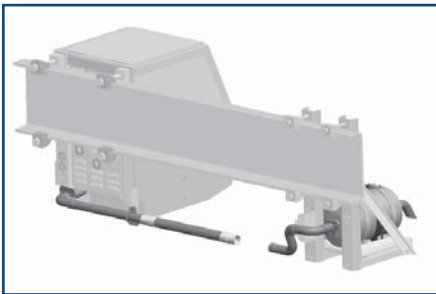

# CARB Compliance for your TriPac™ System

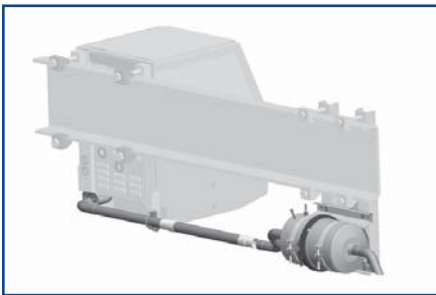

Designed to meet emissions requirements as mandated by CARB for APUs running in California.

Standard Mount

Remote Mount (outside frame rail)

Remote Mount (inside frame rail)

- Regeneration, the process of burning off particulate matter trapped in the filter element, takes place during normal driving hours with no disruption to the driver during rest periods. The TriPac DPF assures an uninterrupted rest period for the driver.
- Will not reduce fuel economy. Saving fuel is important, and the TriPac APU uses no additional fuel with the addition of the DPF.
- Extended APU run time between regenerations assures minimal driver involvement and makes regeneration the exception rather than the rule.
- Reduces engine noise (the quietest is now quieter).
- Designed for minimal maintenance.
- The TriPac DPF places no additional strain on the APU.
- The TriPac DPF has 9 different mounting options, enabling easy installation on most modern tractors despite the trend of less available frame rail space.
- Available as an aftermarket or OE option to support both current and new customers.
- Backed by the Thermo King Dealer Network. Purchase, installation and service — no one supports you like the King of Cool.

## Thermo King is the Green Leader

Thermo King offers industry-leading products and solutions that enable businesses around the world to reduce energy consumption and costs and decrease harmful environmental emissions.

The  symbol means the the TriPac DPF offers significant environmental advantages and is part of Thermo King's family of Green Solutions.

Providing equipment and services to manage controlled-temperature environments for food and other temperature-sensitive products, our Climate Control Technologies sector encompasses both transport and stationary refrigeration solutions. Our product brands include Thermo King®, a world leader in transport temperature control systems, and Hussmann®, a manufacturer of refrigeration and food merchandising equipment.
