## Real World Savings + Real World Durability = Real World Payback

- SmartWay® Certified as an Advanced Side Skirt.
- Meets CARB Requirements.
- Achieved **greater than 7% fuel savings** in an independent test.
- Upper Panel made of industry-standard materials that are both **flexible and durable**.
- Patent Pending, **spring-loaded mounting pillar** not only flexes to avoid damage but is **pre-loaded to eliminate vibration**.
- Pillar is self-enclosed so it **avoids collecting snow, ice, mud, and other road debris**.
- Component design lowers cost of repair. **You only replace what you damage**.
- Single piece, flexible Lower Skirt made of TPV rubber raises wind efficiency and ground clearance (as high as 25") while **lowering the risk of damage**.
- Easy, **bolt-on installation**.
- The **only 4-Way adjustable skirt on the market**. Both the **forward angle and side-pitch can be adjusted to achieve the optimal balance between fuel efficiency, esthetics, and durability**.
- Clean design; **looks like it belongs** on a trailer. The Upper Panel can be color matched.
