## **I am a Scrap Tire Receiver! What do I have to do?**

In June 2003, the Alabama Legislature passed the Alabama Scrap Tire Environmental Quality Act to comprehensively regulate scrap tire accumulations and to provide for cleanup and remediation of illegal scrap tire piles. The effective date of ADEM Administrative Code 335-4 implementing this Act is August 4, 2004.

**Who is a receiver?** A receiver is a person who generates or accumulates scrap tires.

- **Class One Receivers** include retail tire dealers, retreaders, and used tire dealers
- **Class Two Receivers** include all other receivers that generate or accumulate a minimum of ten (10) scrap tires a year including government agencies, vehicle fleet maintenance or dismantling companies, rental or sales operations or other activity that generates scrap tires.

## **What is required of a receiver?**

- Register with the Alabama Department of Environmental Management on ADEM Form 537. This form can be obtained from the ADEM web site or by contacting ADEM at the address above.
- Allow scrap tires to be removed from your location by a permitted transporter only. A registered Class One Receiver may transport their own tires or their customer's tires between the receiver's business locations or their customer's locations without having a transporter permit.
- Make sure that any shipment of scrap tires for off site processing or disposal is accompanied by a completed manifest.
- Collect the Scrap Tire Environmental Fee, \$1.00 for each new, used, or retreaded replacement tire sold, and remit to the Alabama Department of Revenue. You must register with the Department of Revenue.
- Limit the number of scrap tires accumulated to 1500 for Class One Receivers and 300 for Class Two Receivers. No scrap tires may be exposed to the elements for more than 30 days.
- Submit a summary of each quarter's activities to ADEM using ADEM form 539.
- Maintain an operating record that includes the registration application and approval, manifests on scrap tire shipments, quarterly reports, and other documents generated at the facility that are submitted to ADEM.
