

# Bandit Model 990XP Drum Chipper

Bandit's Engineers have done a fantastic job with the compact 12" capacity Model 990XP drum chipper. At 2,400kg, the 990XP easily outperforms all other chippers in its size and weight class. This chipper is perfect for tree contractors, rental yards and councils looking for a compact, yet rugged 12" chipper.

Powered by an 85hp Perkins turbo diesel engine, the Model 990's durable construction along with heavy-duty rugged components will allow for many years of dependable service.

The Model 990XP is narrow and easy to tow. The low machine weight means that the 990XP can be towed with the smallest trucks. The extra wide infeed hopper is fitted with DUAL horizontal feed rollers that are positioned right up against the chipper drum so that the 990XP chips forked material with ease. This dual roller system feeds difficult material VASTLY better than single roller units.

The Model 990XP comes standard with many great features that will increase production and help save you valuable operating time and money. These features include the engine being fitted with a heavy duty 11.5" over-centre clutch (not a light duty belt tightener found on other brands) together with Auto Feed Plus feed control, Hydraulic Lift and Crush and a hand crank height adjustable discharge chute – all these features make the operator's job easier every day they are in the field.

This 12" capacity drum-style chipper will easily out perform any other 12" drum-style chipper in its class. Contact us today so that we can back that claim up on a demo at your job site!

## SPECIFICATIONS
