

## **CARB Updates**

As of: September 28, 2012

Date Published

**9/28/2012** The California Air Resources Board has approved Huss LLC's "kit" for installing their MK-35 and MK-50 diesel particulate filters (DPF) on bobtail transport refrigeration units (TRU).

**9/14/2012** Fleet managers must log into ARBER and check to see if any previously compliant TRUs or gen sets now have a "pending verification" status. Fleet managers with large numbers of units registered in ARBER may click on the "Reports" tab and download a complete list of their units in PDF or CSV format.

**9/13/2012** TRU Advisory 12-23 explains several prohibitions that apply to the sale of noncompliant transport refrigeration units (TRU) and TRU engines. TRU Advisory 12-23 applies to manufacturers, distributors, dealers, repair shops, auctioneers, motor carriers, import/export agents, salvage yards, or any person that sells, offers for sale, imports, delivers, purchases, receives, or otherwise acquires TRUs, TRU generator sets, TRU engines or TRU generator set engines.
